Donate button in github

Donate PayPal

I found 2 ways to add `Donate` function in your github project.

- Markdown
- Button

Markdown

You can get link of image file in SVG file format like this Donate PayPal from `http://shields.io/` and concatinate it with your email code in your PayPal account, please see example below:

```
[![Donate](https://img.shields.io/badge/Donate-PayPal-green.svg)](YOUR_EMAIL_CODE)
```

Button

The button in `Donation` like `Markdown` topic but only change the image.

```
[![paypal](https://www.paypalobjects.com/en_US/i/btn/btn_donateCC_LG.gif)](YOUR_EMAIL_CODE)
```

Donation

If this project help you reduce time to develop, you can give me a cup of coffee :)
